Abstract (en)

[origin: WO2015049101A1] A selector lever for an automatic transmission or an automated manual transmission of a motor vehicle. A selector lever for an automatic transmission or an automated manual transmission of a motor vehicle is proposed, wherein the selector lever comprises a separate, monostable operating element (1) assigned to the position P, and wherein, by the operating element (1) assigned to the position P being actuated depending on the currently engaged position and the state of a driving engine of the vehicle, a starting or turning off operation of the driving engine can be initiated without movement of the selector lever.
