Abstract (en)

[origin: WO2015049236A1] The present invention relates to a cooling device (1) comprising a body (2) having an inner wall (3), an outer wall (4), an insulation volume (5) between the inner wall (3) and the outer wall (4) and an insulation material (6) filled into the insulation volume (5); and wherein gaps are prevented from forming in the insulation volume (5).
