Abstract (en)

[origin: WO2015049338A1] The invention relates to a switchgear cabinet and to a holding device for a transverse mount in an electrical installation switchgear cabinet, said holding device having a holder, which is attachable to a mount profile, is adjustable perpendicularly to the mount profile and is fastenable on the mount profile, a bracket (250), which is locatable movably on the holder (130) and has at least two bracket limbs (230, 240) extending perpendicular to one another, wherein a first bracket limb (240) is fastenable with a slot (290) on the holder (130) and is fixable on the second bracket limb (230) of the transverse mount, wherein the first bracket limb (240) is pluggable into a receiving opening (200) in the holder (130) and is fixable or locatable by means of a fixing arrangement provided on the holder (130), and the fixing arrangement comprises at least one locking screw (355) and a clamping element (365).
