Abstract (en)

[origin: WO2015049441A1] The invention relates to a support (100) for electrical equipment, comprising a frame (110) defining an opening (113A) for receiving an electrical equipment mechanism, bordered by means for receiving the electrical equipment mechanism, and at least two posts (120) extending from said frame, perpendicularly to the frame and facing each other, each comprising a means (121) for mounting the support in a wall (10A). According to the invention, said posts are separate from the means for receiving said equipment mechanism, said support-mounting means being click-lock mounting means, said support also comprising locking means (130, 140) suitable for preventing the release of said mounting means.
