Abstract (en)
[origin: CN205799420U] The utility model relates to an auxiliary equipment for arrange on hand -held tool machine (12a), auxiliary equipment has at least one coupling unit (14), coupling unit (14) set up be used for with ground mechanical coupling can be thrown off to hand -held tool machine (12), especially sets up to be used for the coupling to be in on bayonet instrument acceptance division (16) of hand -held tool machine (12), auxiliary equipment still has instrument acceptance division (18) that are used for receiving bayonet instrument. The utility model provides a, auxiliary equipment includes at least one kayser formula beater mechanism unit (20), kayser formula beater mechanism unit (20) setting is arranged in producing impulse at at least a running state, drives with the impacted style instrument acceptance division (18). The utility model discloses still relate to a hand -held tool machine system.
