Abstract (en)

[origin: WO2015013664A2] A wireless, removable vehicle signaling control and illumination apparatus which may be for use on vehicles. The system may utilize a miniature digital radio transceiver inside a lamp housing to provide wireless control of the lamp. The signaling system may provide a signaling solution for a user which does not require alteration or modification of the vehicle. Such a system may improve conspicuity, safety, and illumination capabilities of the vehicle.
