Abstract (en)
[origin: WO2016039703A1] A switch (60) that contains a heat-resistant main body (10), button (30), lifter spring (50), ignition mechanism (40) and a top piece (20) enabling to fix the mentioned main body (10) to the gas tap (90), wherein the mentioned ignition mechanism (40) contains a fixed contact (42) having a narrow-surface (47) structure so as to reduce the touch surface and increase contact pressure; and a moving contact (43), which is provided with a surface with a radius (46) which prevents the metal part from breaking due to bending and which enables electricity conduction by touching the fixed contact (42).
