Abstract (en)

[origin: CN105876849A] The invention relates to a device for guiding a first packaging material strip (1) in a machine for producing articles for the tobacco processing industry, the device having a first guiding means (3) on which the first packaging material strip (1) is guided, wherein the first guiding means (3) is arranged on a first rack member (11) capable of pivoting about a first pivot axis (17) in first pivoting bearings (25, 26) with respect to a structural member (20) of the device, and the pivot bearings (25, 26) are arranged and designed in such a way that the first pivot axis (17) extends through a section, arranged in the way of being immediately adjacent onto the first guiding means (3) at an upstream along a conveying direction of the first packaging material strip (1), of the first packaging material strip (1).
