Abstract (en)

[origin: EP3056110A1] The present invention relates to a rotation discharge-type cosmetic container characterized in that a content absorbing member, which absorbs a discharged content, is installed on the upper portion of a rotating body such that it is possible to smear only a necessary amount of the content, which has been absorbed by the content absorbing member, on a cosmetic applying means, such as a puff, and use the content, thereby preventing unnecessary waste of the content.
