Abstract (en)
A floral greeting card and/or gift box has a base box with a first cut-out region in a top portion thereof. A floral foam is received within at least a portion of the base box and beneath the first cut-out region. Cut flowers are received by the first cut-out region and the stems thereof are received by the floral foam to maintain the vitality of the floral arrangement. The base box may also have a second cut-out region for receiving a physical gift or the like, such that the entire presentation includes a floral arrangement and a physical gift. A top, preferably of transparent plastic material, may be received over the base box and has sufficient elevation to accommodate the floral arrangement and any gift contained therein.
