Abstract (en)  
[origin: US2016138820A1] A remote control device according to the present invention includes an operation unit for switching and setting an operation state of an apparatus performing at least one of a heating operation and a cooling operation, a display unit that displays a screen on which an operation at the operation unit is reflected, and a controller that controls a display operation of the display unit. The controller causes the display unit to display at least one of a type and a range of an operation state that is able to be switched and set by the operation unit.
