Abstract (en)
[origin: WO2015054716A1] The invention relates to a supply roll for a sealing strip (1) made of an open-pore foam (2), comprising a winding core (5) for the windings (6) of the pre-compressed sealing strip (1), said windings lying against each other under a radial compressive load and the sealing strip being provided with a self-adhesive layer (3) on one side and with a film (4) on the opposite side. In order to create advantageous design conditions, according to the invention the tenacious, preferably air-permeable film (4) laminated onto the sealing strip (1) detachably adheres to the self-adhesive layer (3) of the particular winding (6) lying against the film.
