Abstract (en)

[origin: WO2015055645A1] The invention relates to a hydrocarbon production plant, comprising: a hydrocarbon well (22); a hydrocarbon production line comprising: in the well (22), a production tube (24), and at the surface, a discharge tube (26) from the production tube (24); at the surface, a source (34) of pressurized gas (38); a line (36) for injecting the pressurized gas (38) into the hydrocarbon production line, connected to the source (34) of pressurized gas (38); a pump (40) for circulating hydrocarbons from the well (22); a pneumatic motor (30) for supplying the pump (40) with energy, positioned in the line (36) for injecting the pressurized gas (38) and suitable for being rotated by expansion of the pressurized gas (38). The invention moreover relates to a corresponding production process and to a process for upgrading a plant.
