Abstract (en)
[origin: WO2015055556A1] The invention relates to a pump (1) with a housing, in which an electric motor (3) of a pump step (4) which can be driven by a shaft (10) of the electric motor (3) is arranged. A second pump step (5) which can be driven by the shaft (10) is arranged in series with the first pump step (4), both pump steps (4, 5) being designed as peripheral or lateral channel steps and the running wheels (11, 12) of both pump steps (4, 5) are arranged counter to the direction of conveyance of the respective other pump step (5, 4).
