Abstract (en)
A dispenser (30, 30') for sequentially dispensing a plurality of collapsed cup insulator sleeves in manner that facilitates separation between adjacent collapsed cup insulator sleeves during each extraction or dispensing event. The dispenser includes a housing (32, 32') that defines a discharge opening (37, 37') that is constructed to accommodate dispensing of the collapsed cup sleeves from the dispenser in a singular and sequential manner and a manner that facilitates presentation of a subsequent single cup sleeve associated with a respective end of a stack of cup sleeves for subsequent removal of the respective cup sleeve from the dispenser.
