Abstract (en)
[origin: WO2015059074A1] The invention relates to a printed product (100) having an especially forgery-proof printed security feature (200), which can be produced by using simple means and without complex equipment. The printed product (100) has a printed-product main body (400) having a first and a second main side (410), wherein at least one pattern element (350) arranged in the form of a pattern (360) is located on at least one of the two main sides (410) and wherein the at least one pattern element (350) contains a contrast substance (K) at least in a layer region (320) arranged internally in the at least one pattern element (350). The at least one pattern element (350) is raised on the particular printed-product main side (410) and undetachably connected to the printed-product main body (400).
