Abstract (en)
[origin: WO2015058934A1] The invention relates to a container (10), in particular for liquids, comprising a base body (11) made of a multi-layer, cardboard containing packing material, which base body is connected to a plastics closure body (15). According to the invention, a sealing lip (25) is formed onto the closing body (15) which is designed as a one-piece injection-molded body, said sealing lip jutting out from the closing body and forming an annular receiving pocket (28), a front end region (31) of the base body (11) being arranged in the receiving pocket (28).
