Abstract (en)

[origin: WO2015059077A1] The invention relates to a head (30) for dispensing a cosmetic product, which includes: a device (31) for dispensing the cosmetic product, which has a tubular duct (34) defining a passage (36) for the cosmetic product, and a stopper (6) for blocking the passage (36), which is movable between a position that clears the passage (36) and a position that blocks the passage (36), the stopper (60) including a finger (62) and a skirt (64), the outer surface (48) of the duct (34) and the inner surface (78) of the skirt (64) having complementary engagement means (80, 82) for the rigidly connecting the stopper (60) to the dispensing device (32). The finger (62) supports a peripheral scraping device (70) projecting radially from a peripheral surface (72) of the finger (62), the scraping device (70) having at least one circumferential line (74) suitable for being in contact with the duct (34) when the stopper (60) is in a blocked position.
