Abstract (en)
[origin: WO2015059424A1] The invention relates to a pool-cleaning apparatus including: at least one hydraulic circuit for causing liquid to flow between at least one liquid inlet (3) and at least one liquid outlet (4) and through a filtration device that is removable from the cleaning apparatus. The filtration device includes at least one filtration chamber (8) including: a cover (2), and a pump basket (17). The hydraulic fluid flow system comprises a liquid draining tube (20) emerging from the apparatus via an opening (4) provided in the cover (2) of the filtration device. The pump basket (17) comprises a central filtering wall (9) surrounding the liquid draining tube (20) over at least part of the length thereof.
