Abstract (en)
[origin: WO2015058862A1] The invention relates to a windowsill device for arranging on a house exterior, which windowsill device has a windowsill element, which is provided for arranging on a house exterior in the region of a window opening by means of a fastening device. In order to improve the properties with regard to the thermal insulation properties of the windowsill device and possibly also with regard to the mechanical load capacity of the windowsill device, a natural-stone or artificial-stone windowsill element according to the invention is provided as a windowsill element and an insulating and/or reinforcing layer connected to the natural-stone or artificial-stone windowsill element is arranged on an underside of the natural-stone or artificial-stone windowsill element.
