Abstract (en)

[origin: EP3061364A1] The invention relates to an applicator head (12) for applying a fluid cosmetic product on skin, the applicator head comprising: - a longitudinal body (22, 122) extending along a first axis (24) ; - at least two application elements (26), attached to the longitudinal body. Each application element comprises: - a first part (32) extending inside the longitudinal body, parallel to the first axis, - a second part (36) extending parallel to a second axis (38), said second axis being inclined relative to the first axis, a first end (40) of the second part of each application element emerging from the longitudinal body. Each application element also comprises an inner leading path for the fluid cosmetic product, extending from a second end (34) to the first end (40) of the application element.
