Abstract (en)
A cutting machine for cutting panels (2) of wood or the like has a main pusher (21) for feeding a first panel (2) through a cutting station (15), a secondary pusher (22) and a pushing member (35), which co-operate with one another for feeding a second panel (2) through the cutting station (15), and two actuating devices (27, 32) for driving selectively the secondary pusher (22) and the pushing member (35) with respective laws of motion that are identical to one another or with respective laws of motion that are different from one another.
