Abstract (en)
[origin: JP2016160748A] PROBLEM TO BE SOLVED: To provide a faucet capable of avoiding moisture damage caused because a fluid flowing by coming down to an extractable shower comes down to a hose and flows to a lower part of a faucet support base.SOLUTION: A sanitary faucet 1 comprises a faucet housing 2 having a holding part 3 for an extractable shower 4. A seal element 5 for changing a direction of a fluid, flowing down on a hose 6 of the shower 4, toward an outflow part is arranged in the holding part 3. This enables the fluid to be led out of the faucet housing 2 above a support 8 of the sanitary faucet 1.SELECTED DRAWING: Figure 1
