Abstract (en)

[origin: EP3062029A1] A radiator bracket (1) comprises upper and lower support members for engagement with a radiator or a retainer (11) thereon. A locking device (2) is provided for preventing accidental lifting of the radiator. The locking device (2) is engageable with the retainer (11), or the radiator, thereby fixing the lateral position of the locking device (2) on the retainer (11), or radiator. Hereby lateral shift of the radiator on the bracket (1) is prevented. A system for fixing a radiator on a substrate, includes a radiator bracket (1) and a radiator or a retainer (11) mounted on a radiator. The retainer (11), or radiator is provided with means for engagement (12) with the locking device (2), for preventing lateral shift of the radiator on the bracket (1).
