Abstract (en)
[origin: WO2015063699A1] The present invention relates to a slat roof (1) with several parallel slats (2) which are rotatable between an open position and a closed position, in which at least one slat (2) comprises a panel-shaped element (3) and comprises a profiled section (4, 5) which extends in the longitudinal direction of the panel-shaped element (3) and is attached thereto, which at least partly delimits a slat gutter along virtually the length of the slat (2) and which only extends above and optionally laterally from the panel-shaped element (3).
