Abstract (en)

[origin: WO2015062645A1] It is disclosed an installation tool for an optical conductor storage unit comprising a storage area for storing at least one loop of said optical conductor, wherein said installation tool comprises a body with an axis and a winding surface for winding said optical conductor, wherein said body comprises a first end configured to be arranged close to said optical conductor storage unit and an opposite second end, and wherein a circumference of a section created by intersection of the winding surface and a plane perpendicular to the axis of the installation tool decreases substantially monotonically from said second end to said first end.
