Abstract (en)  
[origin: WO2015094169A1] A method, performed by at least one computer having access to information related to users in a network of users, the network of users comprising a first user and at least a second user associated with the first user via the network. The method comprises using the at least one computer to perform acts of: accessing information related to at least the second user; and causing a virtual assistant, executing on a device different from the at least one computer, to interact with the first user at least in part by performing at least one action based on the accessed information.
