Abstract (en)

The accuracy in temperature control of a preheating roller heating yarns before draws is improved. A preheating roller 33 for heating yarns Y before drawn, conditioning rollers 34 and 35 which are higher in temperature and rotation speed than the preheating roller 33, the yarns Y being drawn between the conditioning rollers 34 and 35 and the preheating roller 33, a thermal insulation box 20 housing the preheating roller 33 and the conditioning rollers 34 and 35, and heat shielding members 42 to 44 provided around the preheating roller 33 are provided. A heat insulation part 48, 49 is provided at least at a region of the inner surface of the thermal insulation box 20 which region faces an installation space 46 which is defined by heat shielding members 42 to 44 and in which the preheating roller 33 is provided.
