Abstract (en)
[origin: EP3064846A1] An air conditioning system (1) is provided with a display portion (21) which informs a user of operational states of air conditioners (10). The display portion (21) is configured to show, during a rotation operation, a rotation sign (S1) indicating that the rotation operation is being performed. This configuration allows for avoiding causing the user to worry about the air conditioner unnecessarily when the air conditioner is deactivated during the rotation operation.
