Abstract (en)
[origin: CN105938943A] The invention relates to a level connection terminal assembly (100) provided with at least two level connection terminals (10) arranged in parallel, wherein each level connection terminal is provided with at least two connection areas (11) arranged in a laminating manner on one lateral side face (13). The level connection terminal device is provided with at least one mark board (16) capable of being fixed in a dismountable manner. In the fixed state of the mark board (16), the mark board (16) at least locally extends along the lateral side face (13) of at least one level connection terminal (10). The level connection terminal extends along the at least two connection zones (11) arranged in a laminating manner.
