Abstract (en)
[origin: WO2015069795A1] A utility glove comprising a glove blank of a fabric material in the form of at least a portion of a hand having a palm side and a back side with one or more areas of elastomeric material injection molded to at least the back side to form one or more three dimensional molded portions of the fabric material with the elastomeric material bonded thereto, wherein the one or more three dimensional molded portions comprise less than the entire glove blank, leaving at least one area of fabric material of the glove blank without elastomeric material bonded thereto, and a coating on at least an area of the fabric material of the glove blank without elastomeric material injection molded thereto.
