Abstract (en)

[origin: WO2015106897A1] The invention relates to a vehicle, in particular a rail vehicle (10), comprising a compressed air-operated toilet device (100) and a compressed air supply system (40) which supplies compressed air to the toilet device (100) during normal operation. According to the invention, the vehicle includes an emergency compressed air source that is suitable for providing compressed air (DR) in order for the toilet device (100) to stay in operation when the compressed air supply system (40) has broken down.
