Abstract (en)  
[origin: WO2015067627A2] The invention relates to a nonwoven laying apparatus (3) and a nonwoven laying method. The nonwoven laying apparatus (3) comprises a laying device (7) that folds a delivered fiber web (4) and forms a multilayer nonwoven fabric (14) on the discharge belt (15) of a discharging conveyor (13) that runs transversely or at an angle to the feeding direction (26). According to the invention, the travel profile of the discharge belt (15) is set in such a way as to vary in the discharge direction in the vertically projected zone below the web outlet (12) of the laying device.
