Abstract (en)

[origin: WO2015062989A1] The present invention relates to a washer comprising a dispenser (1) having more than one division (2) wherein cleaning agents are stored and at least one valve (3) disposed on the dispenser (1). The washer further comprises an emptying apparatus (4) that enables the cleaning agents in the dispenser (1) to be discharged by the valve (3) being triggered by the user. The emptying apparatus (4) serves as switch, th user grasps the emptying apparatus (4) from the handle (7) and discharges the dispenser (1) by inserting the end (5) into the valve (3). The emptying apparatus (4) enables the cleaning agent in the dispenser (1) to be discharged without being wasted, spilled over or scattered when the cleaning agents in the dispenser (1) are desired to be emptied on request or in cases such as the user accidentally putting softener into the liquid detergent division.
