Abstract (en)

[origin: WO2016062448A1] The invention relates to a test cable and a jack adapter for a test cable. The jack adapter comprises a plug strip with contact pins which are located at a distance from each other on a main body and have a jack contact section and a circuit board contact section, and also comprises a contact maintaining board that is connected to the main body and has individual through-holes which delimit the circuit board contact sections from each other and are each designed to stationarily hold a plug-in lug located at a conductor end.
