Abstract (en)
   [origin: CN105966949A] The invention relates to a printing machine (100) comprising at least one printing station (1) used for printing planform
   elements; the printing machine also is provided with a convey system (9) used for conveying planar elements (1000); the convey system (9) is
   provided with a plurality of convey platforms (4) annularly traveling along sealed convey routes (7, 8), a carrier plate, and a drive unit (5) driving the
   convey platforms (4); the drive unit (5) is provided with an annular package conveyer (12) driven by a servo motor (11); the package conveyer (12)
   is provided with an actuator (13), wherein the actuator (13) is temporarily engaged with the conveyer platforms (4) so as to allow the convey platform
   to move along the certain route (7)of the convey routes; the convey system (9) has constant speed on the route, is not sensitive to dirt, and simple in
   structure and assemble.
