Abstract (en)  
[origin: EP3067268A2] The present invention falls within the field of competition row boats, for canoeing or rowing sports, and may be configured as a canoe, a kayak or a boat for rowing practice. It is an object of the present invention a competition row boat (5) with a cockpit zone (3), a bow zone (1) - between the cockpit zone (3) and the fore body (6) - and a stern zone (2) - between the cockpit zone (3) and aft (7) - wherein, in the bow zone (1), the value of the breadth (8) corresponding to any waterline of a vertical section has its maximum value essentially close to the keel (9) and continuously decreases up to the deck (10). Additionally, it is another object of the present invention a competition row boat (5) whose fore body (6) is below the design waterline, with the stem (11) projecting to aft (7) in the direction of the deck (10).
