Abstract (en)

Support device (100) for a washing basket (2) of clothes to be hung up on a free-standing clothes horse (20), a balcony railing clothes stand or similar, comprising: - a load-bearing frame structure (101), comprising at least two longitudinal members (4) resting, at one end, on a ground support plane by means of respective feet (5) and, when in use, inclined with respect to said ground support plane, and - at least two support arms (3), each articulated to a respective longitudinal member (4) and oscillating around an essentially horizontal axis, with a rotation of around 90°, between a stable working position, substantially orthogonal to said longitudinal member (4) -- wherein said at least two arms (3) are co-planar with one another and extend from a same zone of said longitudinal members (4) -- and a non-working position resting against the respective longitudinal member (4), so that said washing basket (2) is stably supported between said support arms (3), in the working position, and said at least two longitudinal members (4), are at a level higher than the level of the ground.
