Abstract (en)  
[origin: WO2016146305A1] The invention relates to a micromechanical part, particularly for clockwork mechanisms, locally comprising at least one area which is microstructured by means of a laser, the microstructured area having a three-dimensional surface consisting of microcavities designed to be used as a reservoir for a lubricating substance.

Abstract (fr)  
Pièce de micromécanique, destinée notamment aux mécanismes d'horlogerie, comprenant localement au moins une zone microstructurée au moyen d'un laser, la zone microstructurée présentant une surface tridimensionnelle formée de microcavités configurées pour servir de réservoir pour une substance lubrifiante.
