Abstract (en)
[origin: WO2015067822A1] A garment (100) for aiding infants learning to crawl has a number of non-slip members (116) on an outer surface of the garment (100) which aid grip on relatively smooth floor surfaces. These non-slip members (116) come into contact with the floor as the infant crawls on the floor to provide an improved and secure grip which facilitates crawling.
