Abstract (en)
[origin: CA2928335A1] The invention relates to an amusement park ride (1) with a guide track (2) which has a first pivot axis (6) for the movable guidance of the guide track, wherein the guide track is retained in a movable manner along the first pivot axis by way of a first retaining means (10), wherein the first pivot axis is oriented in a first axial direction, perpendicular to the direction of the guide track on the first pivot axis, and can be moved perpendicularly to the first axial direction. According to the invention, the guide track has a second pivot axis (8) for the movable guidance of the guide track, wherein the guide track is retained in a movable manner along the second pivot axis by way of a second retaining means, and the second pivot axis is oriented in a second axial direction, perpendicular to the direction of the guide track on the second pivot axis, and can be moved perpendicularly to the second axial direction.
