Abstract (en)

[origin: WO2015073008A1] A gasket insertion cradle (10;210) with a bottom frame portion (12;212) configured to align a gasket (22) between opposing flanges (24,26) of a flange assembly and capable of being removed from the flange assembly by simply rotating the frame portion (12;212) free once the gasket is within ring grooves (28) of the opposing flanges. Gasket insertion devices may have a top portion (236) hinged to the cradle and configured to secure a gasket between the top portion and the cradle (210) during installation.
