Abstract (en)

[origin: WO2015070836A1] The invention relates to coke oven operating machines, which in each case comprise a coke discharging machine, a coke transfer machine, a wet quenching car, a quenching locomotive and a filling carriage. The coke discharging machine and the coke transfer machine each have a door lifter, a frame cleaner and a door cleaner. The door lifter, the frame cleaner and the door cleaner are designed as separable modules so that they can be used for both machines.
