Abstract (en)

[origin: WO2015090638A1] The invention relates to an electromechanical or digital watch, the watch (1) including a middle (2) which defines, together with a glass (4), a watch case (6), the glass (4) including an upper surface (8) which faces towards a user, and a lower surface (10) which faces the watch case (6), the watch (1) also including a dial (18; 36) made of an electrically non-conductive material, the dial (18; 36) including a lower surface (28) and an upper surface (30) located on the observer side, the watch being characterised in that electrically conductive tracks (26; 40) for connecting one or more electronic components (16, 22) are structured on at least one of the lower (28) or upper (30) surfaces of the dial (18; 36). The invention also discloses a method for manufacturing such a dial.
