Abstract (en)
[origin: WO2015071527A1] The invention pertains to an automated system for vending products for the customer. The system comprises of a number of modules (1) placed side by side or on top of each other, in which the products to be sold can be placed, the modules having a product box (2) in the front end, and a transfer device for transferring the product into the box. In addition, the system comprises of a payment instrument log-in device (16) and each module comprises of a reading device, with which a logged-in client can be identified, and when identified, the customer can take a product from the product box.
