Abstract (en)
[origin: WO2015067409A1] The invention relates to a connecting arrangement (100) between an electric or electronic device (10) and a plug connection unit (20). Said device (10) has first electric connections (1) which are aligned parallel to each other by means of a first positioning device (13) within a connection area (12) of the device (10), and second electric connections (2) which interact with the first electric connections (1), are aligned to the first electric connections (1) by means of a second positioning device (32; 38) in a plug housing (18) of the plug connection units (20).
