Abstract (en)
[origin: CA2930491A1] The invention relates to a protective cover for a mobile device, in particular for a mobile phone or tablet computer, said protective cover comprising: a protective element (14, 15), the protective element (14, 15) being substantially flat and having an outline extending over an outline of the mobile device, and having a non-rigid peripheral area; and elastic holding elements (2), in particular elastic holding elements made of a rubber material, each holding element (2) being substantially linear in form, the holding elements (2) being arranged on a contact side of the protective element (14, 15) in such a manner that, when a mobile device is introduced into the protective cover, the holding elements extend diagonally across the corner regions of the mobile device, thereby securing the mobile device to the contact side by a rear side of the mobile device.
