Abstract (en)  
An object of the present invention is to provide dough which can provide bread and baked confectionery with the good appearance and the suppressed dry texture, even though the dough includes the cereal flour containing a large amount of dietary fiber. Another object of the present invention is to provide bread and baked confectionery obtained by baking the dough. According to the present invention, bakery dough including: 10 to 60 mass% of cereal flour containing 4 mass% or more of dietary fiber; and 1 to 35 mass% of medium-chain fatty acid containing triacylglycerol (MTG), and bakery products obtained by heating and baking the bakery dough are provided.
