Abstract (en)

[origin: EP3069664A1] A cartridge assembly for use with a surgical instrument including a cartridge, a longitudinal channel, a first row of slots, and a second row of slots. The cartridge has a proximal portion and a distal portion. The longitudinal channel extends between the proximal portion and the distal portion. The first row of slots is disposed on a first side of the longitudinal channel. At least one slot in the first row of slots is empty. The second row of slots is disposed on a second side of the longitudinal channel. At least one slot in the second row of slots has a staple disposed therein.
