Abstract (en)

The invention relates to a cleaning assembly (1) for cleaning the inner walls of a container, comprising: - a guiding frame (4), with a first end, which guiding frame is moveable in a direction of transport; - a cleaning frame (14), moveable in the direction of transport along the guiding frame; and - at least one cleaning head (16), attached to the cleaning frame and hingeable along an axis parallel to the direction of travel, the cleaning head comprising at least one cleaning nozzle, connected to cleaning means. The invention further relates to a combination of a cleaning assembly and a container to be cleaned.
